

Boost the value of your hay production

Discover HAYTECH, the smart solution designed to improve the profitability of hay production. Stock protection, quality monitoring, surround yourself with the ultimate assistant, designed for and with professionals in the field.

Used every day by more than 1700 producers, cooperatives and producers

A single interface for complete hay management

Developed with professionals, HAYTECH is the simplest and most powerful solution to optimize the profitability of your haystacks.

Secure your hay production

HAYTECH alerts you in case of abnormal heating and allows you to anticipate the risk of hay fire. Do not take the risk of losing your hay production.

Reduce labor costs

HAYTECH limits the risk of work accidents by giving you access to all information remotely. Limit dangerous handling and monitor remotely your hay production.

Optimize your production

HAYTECH offers a nutritional value indicator for your forage, helping you optimize production. It allows you to control forage quality during storage, potentially increasing milk production by 3 liters per cow and prioritize pastures based on preservation quality.

Reduce your concentrated food budget

HAYTECH supports you in better controlling the quality of your forage. As a result, you will achieve significant savings on the annual budget allocated to concentrated food.“

View your entire stock at a glance

HAYTECH allows you to monitor your entire storage site regardless of the size of your production.

Monitor the temperature of entire production

HAYTECH offers a site modeling of your operation. Easily identify color risk areas using intuitive color-coded system.

Track the live progress of your forage quality over time

Access the nutritional value with our feed value indicator in a single click to ensure the quality of your forage.

Access the complete temperature history of each forage bale

With a single click, open the temperature history tracking.

Discover the smartest hay quality monitoring system

HAYTECH is the revolution that gives you access to accurate real-time tracking. You'll love the quality of the interface and the tailored features thought out to follow you everywhere on the field.

Full wireless monitoring system

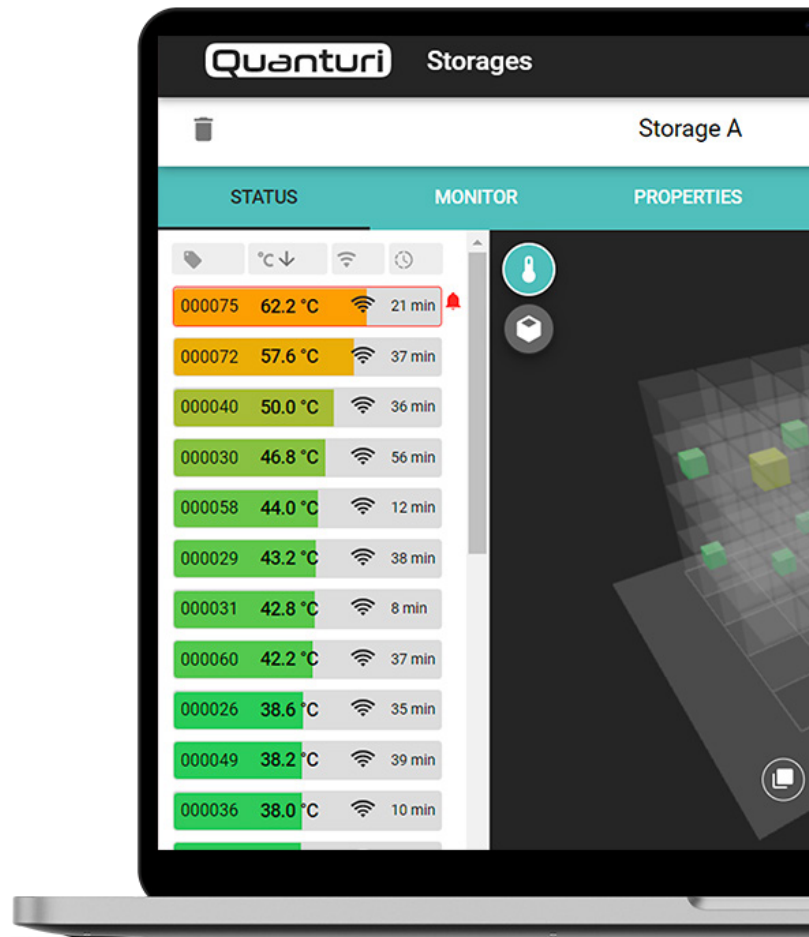

- ✓ Dashboard with a complete 24/7 view of your operating site
- ✓ Recyclable probes designed for any type of fodder

Complete mapping

- ✓ Mapping of the operating site
- ✓ Mapping of each storage
- ✓ Mapping of each haystack in the sheds

Customization of alert levels

- ✓ Configurable notifications to adapt to risks
- ✓ Unlimited number of notifications
- ✓ Customization of settings (notifications, alert level, users, etc.)

Join the HAYTECH Community

A few words from the professionals

« The quality of the fodder with which I feed my animals is very important to me. The HAYTECH system allows me to trace the quality of my hay by monitoring its temperature.»

Marie ROY, farmer in Vevy - France

« I was always worried that my hay would catch fire, I always had to go monitor it. With HAYTECH, I have finally found peace of mind. »

Benoît Guillaume, farmer in Brans - France

« HAYTECH allows us to get real-time temperature data which helps us control the quality of the final product. »

Christophe Colas, Durepaire SA - France
